

MONOBLOCK Art. 102

Art. 102

Morsetti universali per vani motore e bagagliai.

Questi 2 morsetti montati su tubo estensibile, sono stati studiati per assicurare che, durante il tiro, non si deformino i vani motore e bagagliaio delle vetture.

La lunghezza del MONOBLOCK lo rende adatto anche per vani vetture di grandi dimensioni. Dotato di morsetti intercambiabili.

Universal holding clamps for trunk openings and engine locations.

This set of clamps, connected with extensible adjusters, was designed to insure that during body straightening operations the trunk and engine openings are not deformed.

Because of its special length it is suitable to large size cars with big trunks door motor openings. Equipped with interchangeable jaws.
